Animal

Communicators

Chuck and Suzanne Fisher of Nature's Country Store are both talented Animal Communicators.

They are available if their booth is not busy to assist you and your cat with any problems that arise during the show.

This service is free of charge to exhibitors during Cat Shows.

Natural Meds: A Kinder, Gentler Way to Treat Our Beloved Pets

Most people know little about natural medications, so they avoid them when they could be quite useful in treating our pets' problems. Not all problems require a visit to a veterinarian. Not all pet problems require drugs to fix. In fact, an overuse of drugs with both the human and pet populations has led to the advent of superbugs that are hard to tame and that often kill us. So, it is in our best interests to find ways that do not involve antibiotics to heal our ills whenever we can. Many processed pet foods lack the nutrition

our pets need. Multivitamins are a great way to see that they get the nutrients they need. The following companies make multivitamins for pets:

- **Dancing Paws** (both feline and canine multivitamins)
- **Dr. Goodpet**
- **Pet Guard** (multivitamins for dogs)
- **Pet Naturals of Vermont**

(You can get these at ShopNaturescountry-Store.com) Homeopathic remedies exist for many problems your pets may encounter. Homeopathic remedies (also

Want to grow big, pretty, healthy cats? Give us the good stuff!

called homeopaths) are a system of medicine based on three principles:

- Like cures like (For example, the cure for poison ivy or oak exposure is Rhus Toxicodendron, a

Catty Truths

A cat's body language and actions can tell you a lot about what the cat is feeling.

Tail Talk

For instance, when the tip of the tail is moving, it means that the cat is

aware of what you are saying and is relaxed with the fact that it can ignore you for as long as you can talk.

When the cat's tail movement has taken over one half of the tail, it means that you have just said something disagreeable to

the cat.

If this is followed by the whole tail moving back and forth, it means that you would do well to shut up soon.

If the tail switches back

(Continued on page 2)

Dear Aunt Catty

Tell Aunt Catty your problems...

Dear Aunt Catty,

My person will not come when I call him. No matter how loud I Yow, he ignores me. How can I get his attention?

Sincerely,

Yower

~~~~~

Dear Yower,

Sometimes your person may just ignore you. Do you YOWL too much? It also depends on what your person is doing at the time you want his attention.

If he is busy working or cleaning, you know, like running that big sucking machine, you may have to back off and wait for a more opportune time.

Wait until your person has just settled down on the sofa and then YOWL. Or better yet, wait until he is almost asleep, and then walk gently across him in bed and start purring in his ear and tickling him with your whiskers. Believe me, you will get his attention very quickly.

Another trick is to climb up on the highest point in the main

room, YOWL, and then knock something over. This will also get his attention very quickly.

AC

How to teach a cat to play Fetch

First, get you your cat, and your cat's favorite wand toy into the same room. Tell the cat that you want it to learn to play Fetch.

Ignore comments from the cat such as "Why you lazy human! Fetch the blasted stick yourself!"

Engage your cat in active play with the wand toy. Then throw the toy across the room. Your cat will look at you and then at the toy.

Encourage your cat to go get the toy

and bring it to you. Tell the cat that play time is over unless it gets the toy.

Direct the cat's attention to the toy by pointing to it and saying things like, "Go get the toy. Fetch the toy." Ignore the cat's unsettling stare which, roughly translated, means

First, find the cat.

"You buffoon, what is your problem?"

Continue to encourage your cat to fetch the toy. Promise your cat treats for getting the toy and bringing it to you.

Promise to scratch or rub a favorite spot on the cat if the cat complies.

Then go get the toy yourself.

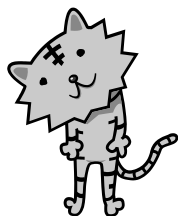

Catty Truths, Cont.

(Continued from page 1)

and forth and fast, bumping up against things with a loud thump, it means that it is time for you to not only shut up, but think about leaving fast.

When the tail thrashes around and the eyes turn to glare at you, you may as well get your Speedos on and run for your life.

Facial Expressions

A cat never lies!

Cats have a wide range of facial expressions. Mouth open and neck extended means a hair ball is imminent.

Teeth bared either means something stinks and the cat is trying to determine the origin of the stench. Better hope it isn't you.

The intent stare is a pre-pounce mechanism to mesmerize and disarm prey. This is often seen when your toes move under the bed covers.

Forehead furrowed means you have said something not quite believable to the cat.

And our personal favorite is the expression in which the sides of the mouth curve upward, otherwise know as a smile.

Natural Medications, cont.

minute amount of poison oak.)

- Minimal Dose (The remedy is taken in an extremely dilute form; normally one part of the remedy to around 1,000,000,000,000 parts of water.)
- The Single Remedy (No matter how many symptoms are experienced, only one remedy is taken, and that remedy will be aimed at all those symptoms.)

Similar principals are used in conventional allergy treatment, where the allergic substance is given in a small dose, and in vaccines where an impotent form of the virus is given to bolster the immune system against that particular virus.

Homeopathic remedies are available by the following companies for these problems:

- **Dr. Goodpet** (Arthritis Relief, Calm Stress, Diar-Relief, Ear Relief, Eye-C, Flea Relief, Good Breath, Scratch Free)

- **HomeoPet** (Anxiety, Anxiety TFLN, Cough, Digestive Upsets, Flea Bite, Hot Spot, Joint Stress, Leaks No More, Miliary Eczema Female, Miliary Eczema Male, Nose Relief, Skin & Seborrhea, Skin and Itch Relief, Trauma, Travel Anxiety, Worm Clear).

These remedies are available at most large health food stores

and at ShopNaturesCountryStore.com.

Flower Essence Services also has a product called Animal Rescue. The Animal Rescue Formula was created by Teresa Wagner to help with the healing of current and post-traumatic stress of animals living in rescue and shelter facilities, in foster homes, and for those who have been adopted into loving, permanent homes but are still exhibiting signs of trauma from their past.

The bottom line is that you can treat a wide variety of illnesses and problems with natural medications that work with your pet's body to heal the root cause of the illness. This saves you money in the long run.

And when you really do need an antibiotic, think about using Colloidal Silver or Oil of Oregano. They both are antibiotics, antifungals, and antivirals.

Colloidal Silver

Colloidal silver is a powerful, natural antibiotic and preventative against infections.

Acting as a catalyst, it reportedly disables the enzyme that one-celled bacteria, viruses and fungi need for their oxygen metabolism. They suffocate without corresponding harm occurring to the body's enzymes or body systems.

ShopNaturesCountryStore.com for safe pet products

Colloidal silver was used commonly as an antibiotic, antifungal and antiviral until 1938. Some people may even remember their grandparents putting silver dollars in milk to prolong its freshness at room temperature.

Prior to 1938, colloidal silver was used by physicians as a mainstream antibiotic treatment and was

considered quite "high-tech." Production methods, however, were costly. The pharmaceutical industry moved in, causing colloidal research to be set aside in favor of fast working and financially lucrative drugs.

Taken orally, the silver solution is absorbed from the mouth into the bloodstream, then transported quickly

Colloidal Silver's Uses

(Continued from page 3)

to the body cells. Swishing the solution under the tongue briefly before swallowing may result in faster absorption. In three to four days the silver may accumulate in the tissues sufficiently for benefits to begin. Colloidal silver is eliminated by the kidneys, lymph system and bowel after several weeks.

The Many Uses of Colloidal Silver

Colloidal silver may be used as a nasal spray mister to reach the sinuses and nasal passages. It may be used to treat the skin, a sore throat, pink eye, burns, etc. Colloidal silver is painless on cuts, abrasions, in open wounds, in the nostrils for a stuffy nose, and even in a

baby's eyes because, unlike some antiseptics, it does not destroy tissue cells. It is also excellent as an underarm deodorant, since most underarm odor is caused by bacteria.

Colloidal silver can be applied directly to cuts, scrapes, and open sores, or on a bandage for warts. It can be applied on eczema, itches, acne or bug bites.

To purify water, add one tablespoon per gallon, shake well and wait six minutes. Mixed this way, it's tasteless.

It may even be put in spray bottles for use in killing bacteria on kitchen and bathroom surfaces.
